

Homework part 1

Luka Milosevic

Slide 1

birthday: 01/01/1995

growing up: town called Krusevac in the South Serbia (Southern Europe). Fun fact, this town was founded in 1371.

program: PhD in Agronomy and Horticulture - weed science
specialization

expected graduation: December 2024

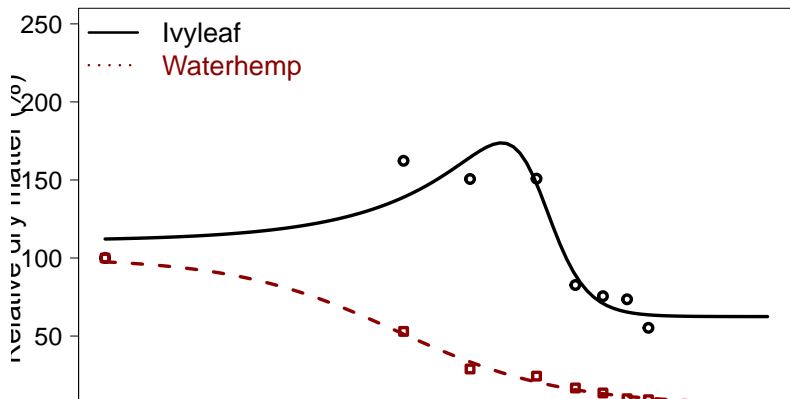

Slide 2

My favorite animal is my wolf-dog

Slide 3

This slide depicts my current work - different response types of plant species to increasing level of herbicide. One of the species, ivyleaf morningglory exhibits an increase of the response (relative dry matter) when exposed to certain doses of herbicides, which confirms the idea of a toxicology phenomenon called *hormesis*.
